ALIGN

ACCOMMODATING LIFE'S CHANGES

Align is an award-winning, highly configurable lighting system, designed to accommodate the changing needs of any space.

AWARDS RECEIVED FOR ALIGN:

The image shows a black track lighting system against a white background. A long, black track rail runs diagonally from the top left towards the bottom right. Several components are shown: a spotlight head is mounted on the rail; a separate rectangular module with ventilation slots is shown in the center; another rectangular module is shown at the bottom right, attached to a vertical cylindrical base; and a thin black cable runs parallel to the track rail.

ARCHITECTURAL LIGHTING SYSTEM

There's an infinite amount of configurations and lighting designs available thanks to Align's modules, mounting options and adaptability.

UNLIMITED ADAPTABILITY

Align's modules are completely removable and can be repositioned at any time after installation.

INTEGRATED UPLIGHT

The suspended Align, ALG2, features integrated uplight with independent dimming control.

LINEAR ILLUMINATION

With Pace, customize your linear ambient lighting with three lens options: HE Tech™, Baffled Optic 55° and Baffled Optic 22°.

DISCREET PLACEMENT

Pace accessories add precision lighting without direct sight line to the light source.

EDGE TO EDGE, DOWN AND UP

The Stride module is available in 4 lengths and can be adjusted on-site to a dropped position.

ALL ABOUT ANGLES

ALTA 45 and ALTA 55 are available in narrow and medium beam angles. ALTA 65 is offered in four beam angles: very narrow, narrow, medium narrow, and medium. All projector heads can be swiveled as needed to light your subject.

MOUNTING OPTIONS

Align is available in recessed, surface, and suspended mounting options.

ALIGN 3
Suspended

SUSPEND DISBELIEF

Align is a small profile lighting system with magnetic accessories, integrated indirect illumination, and power supply. Prepare to be amazed.

POWER OPTIONS

Drivers can be installed remotely in a recessed box or inserted directly in the system for easy access and simple installation.

INDIRECT ILLUMINATION

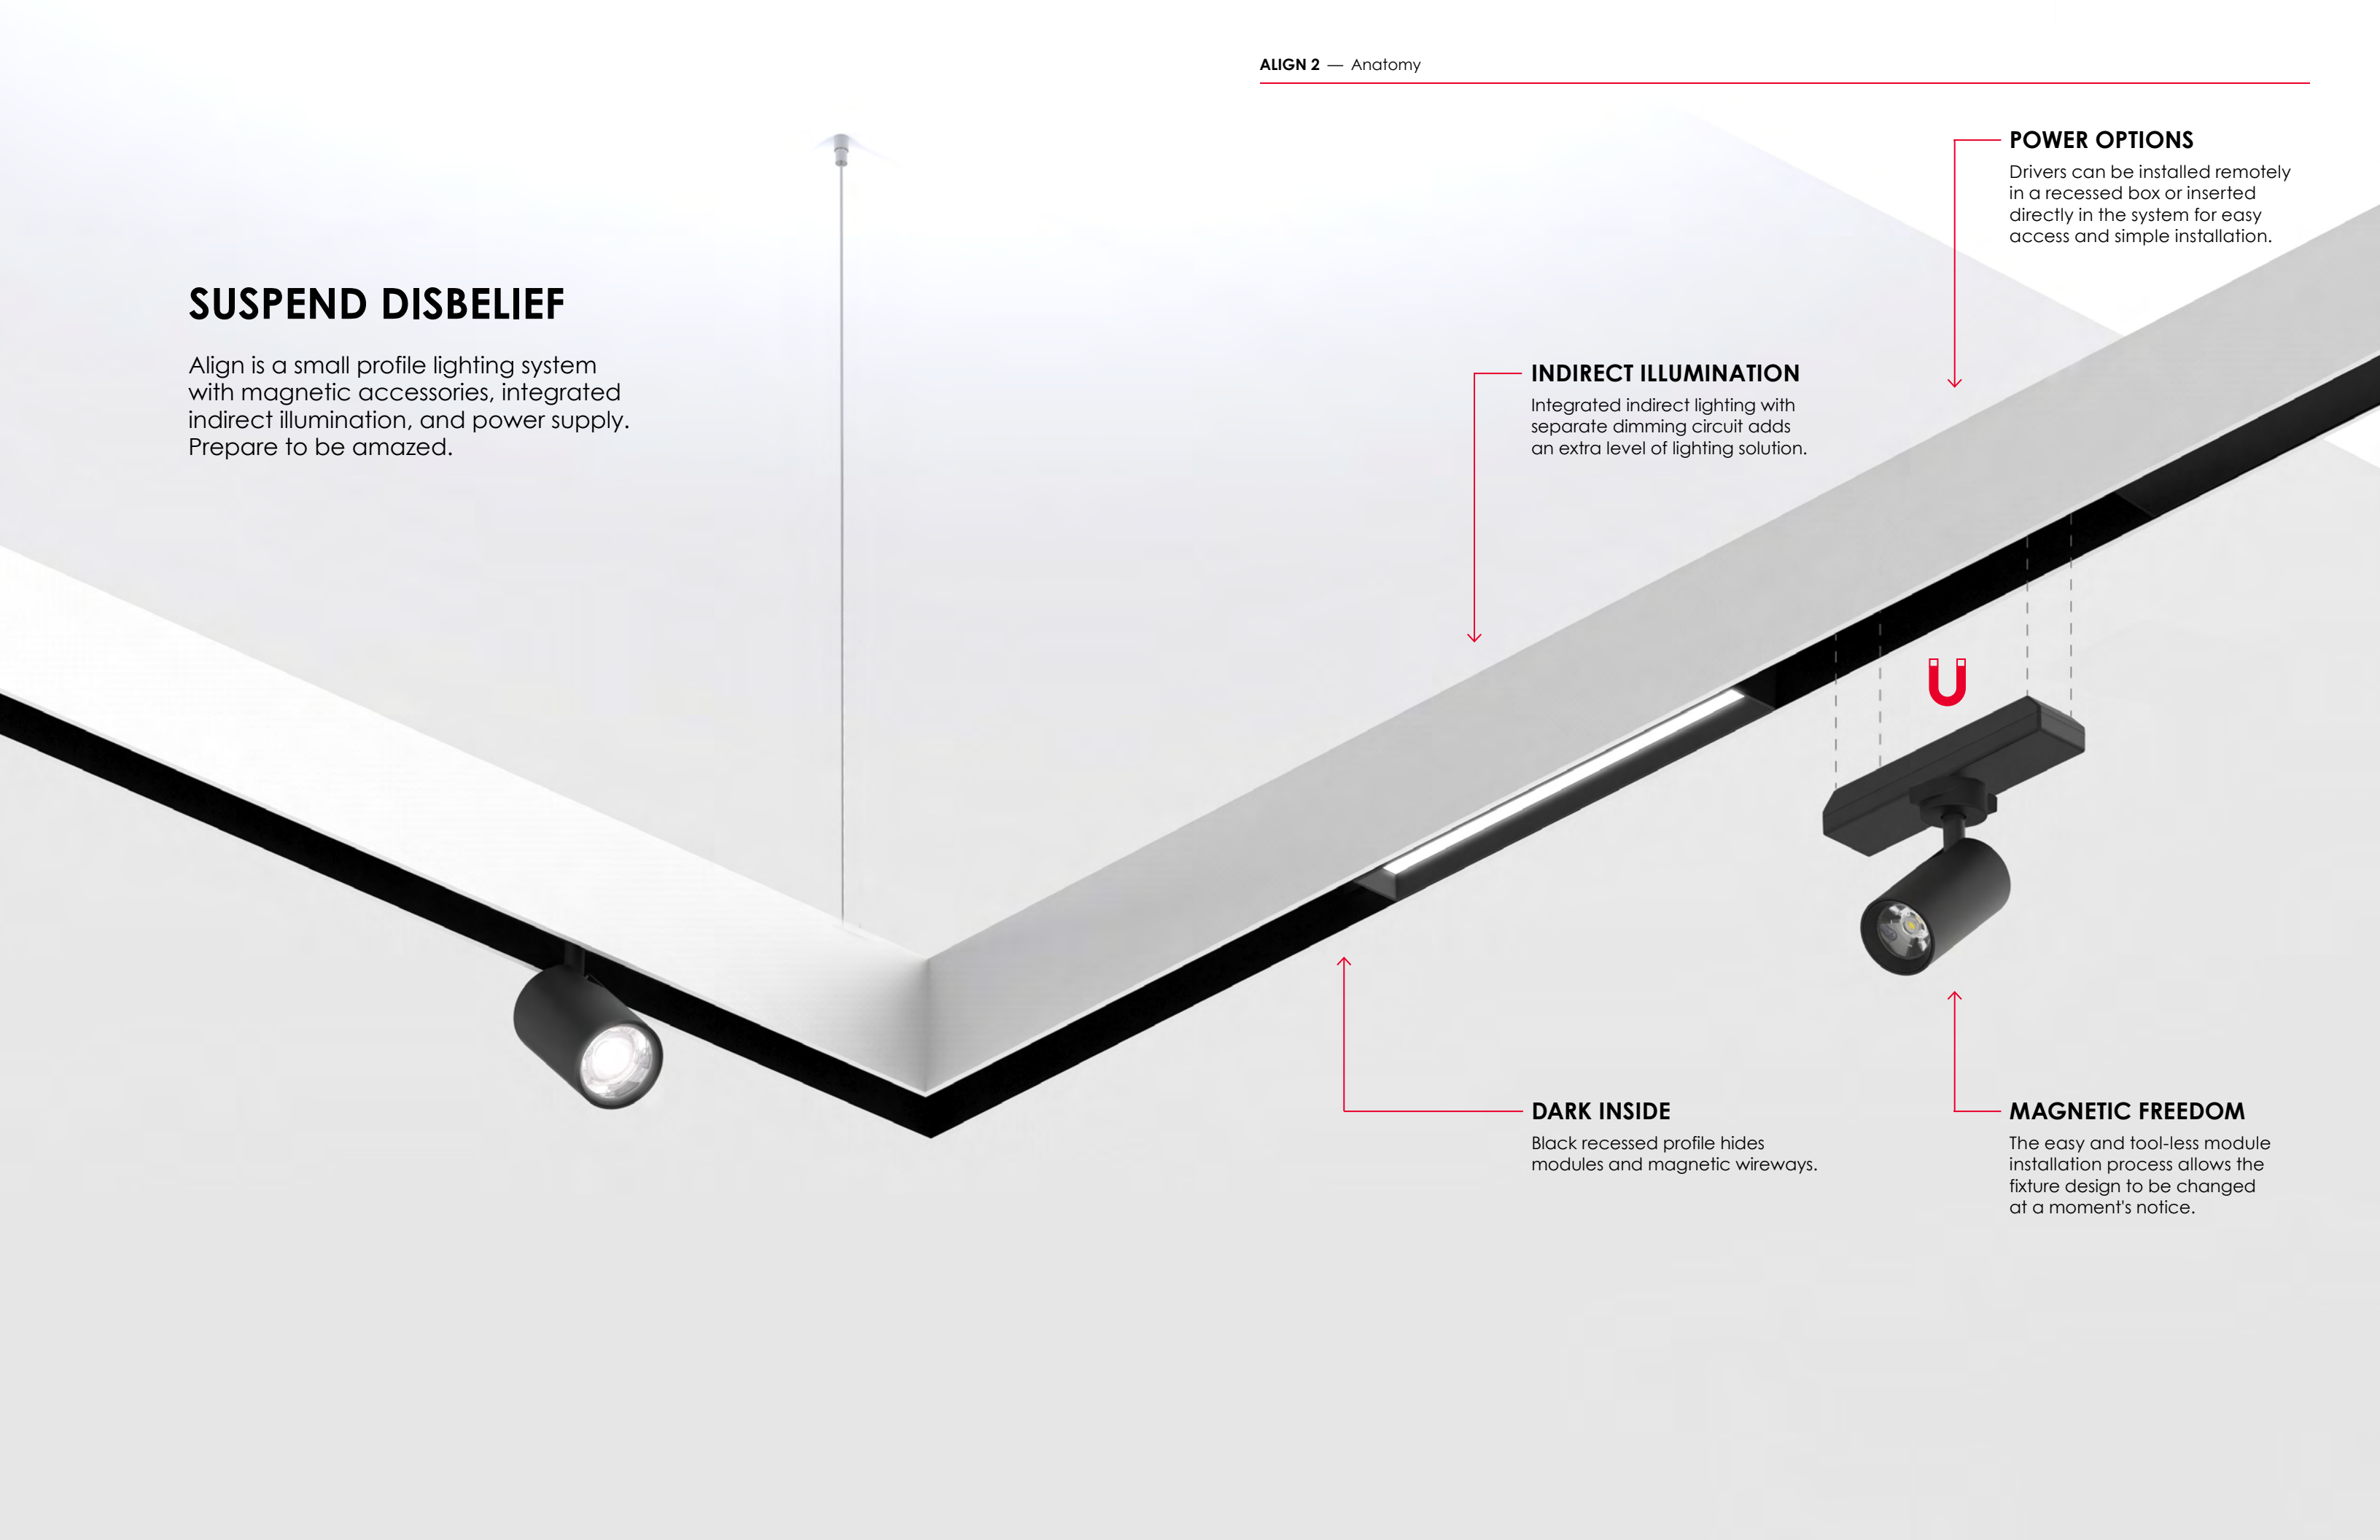

Integrated indirect lighting with separate dimming circuit adds an extra level of lighting solution.

DARK INSIDE

Black recessed profile hides modules and magnetic wireways.

MAGNETIC FREEDOM

The easy and tool-less module installation process allows the fixture design to be changed at a moment's notice.

ALIGN 5
Recessed

VANISHING ACT

A recessed mounted Align integrates into the design of a room while providing high performance illumination when and where you need it.

DARK INSIDE

Black recessed profile hides modules and magnetic wireways.

MAGNETIC FREEDOM

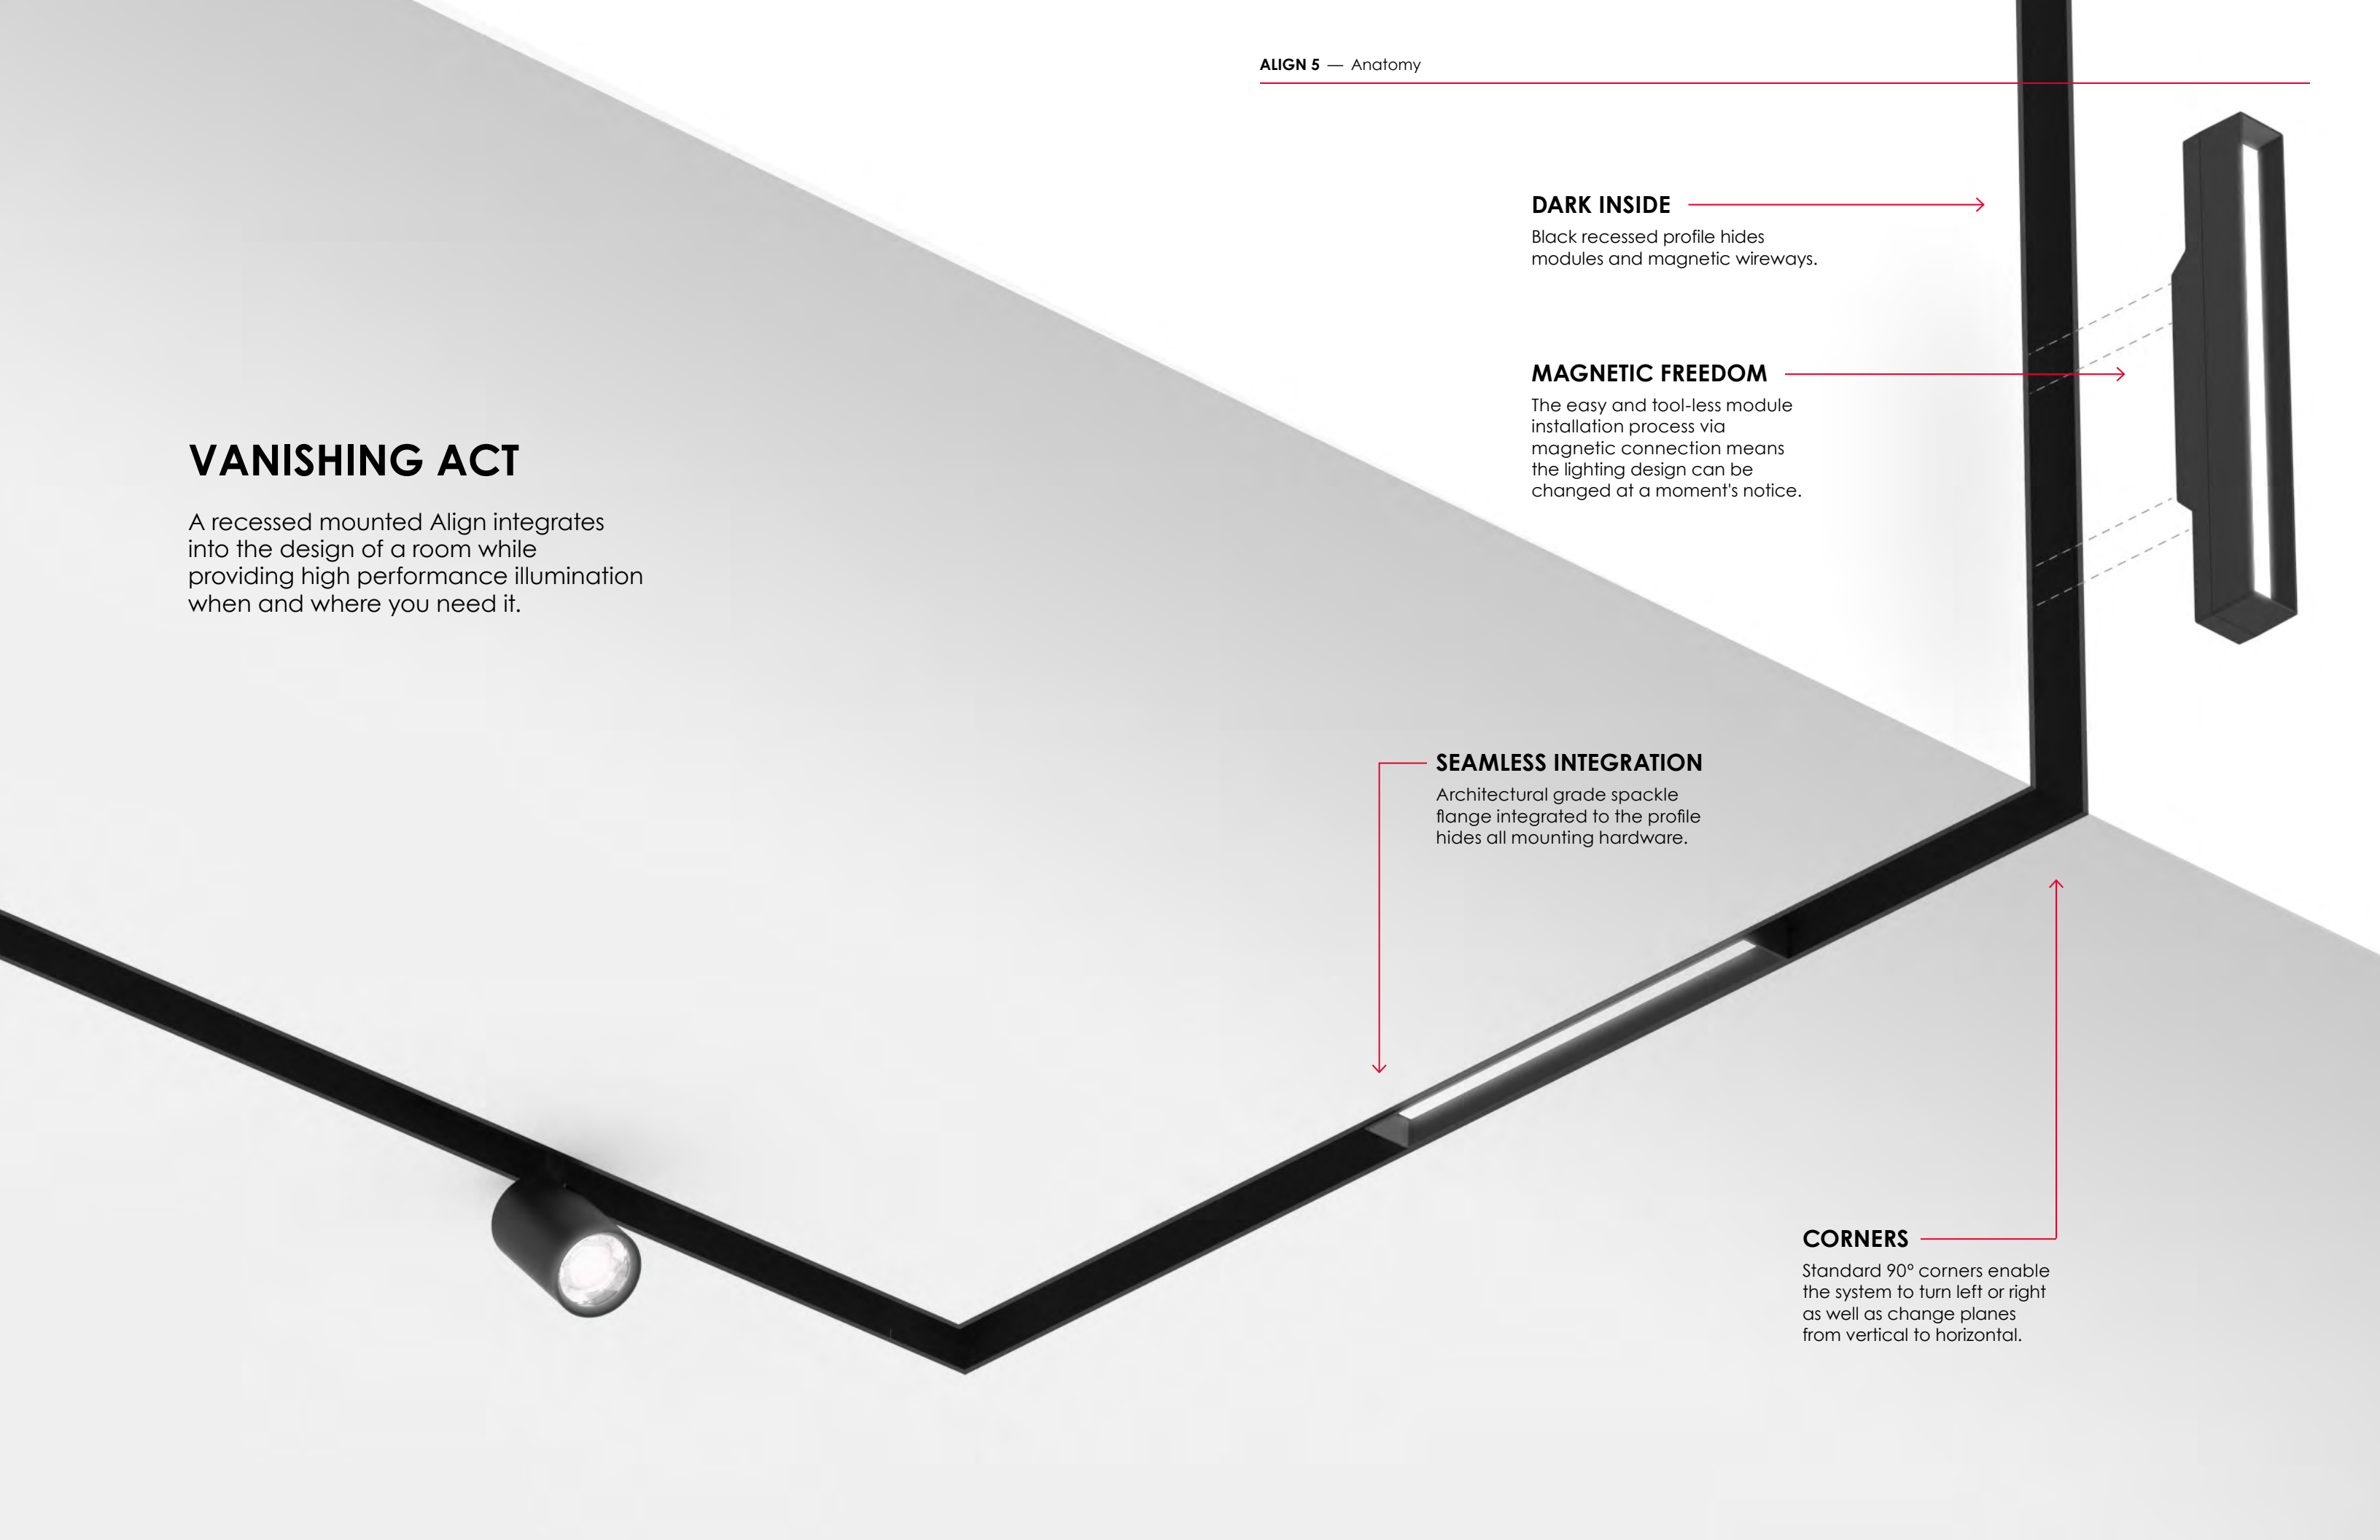

The easy and tool-less module installation process via magnetic connection means the lighting design can be changed at a moment's notice.

SEAMLESS INTEGRATION

Architectural grade spackle flange integrated to the profile hides all mounting hardware.

CORNERS

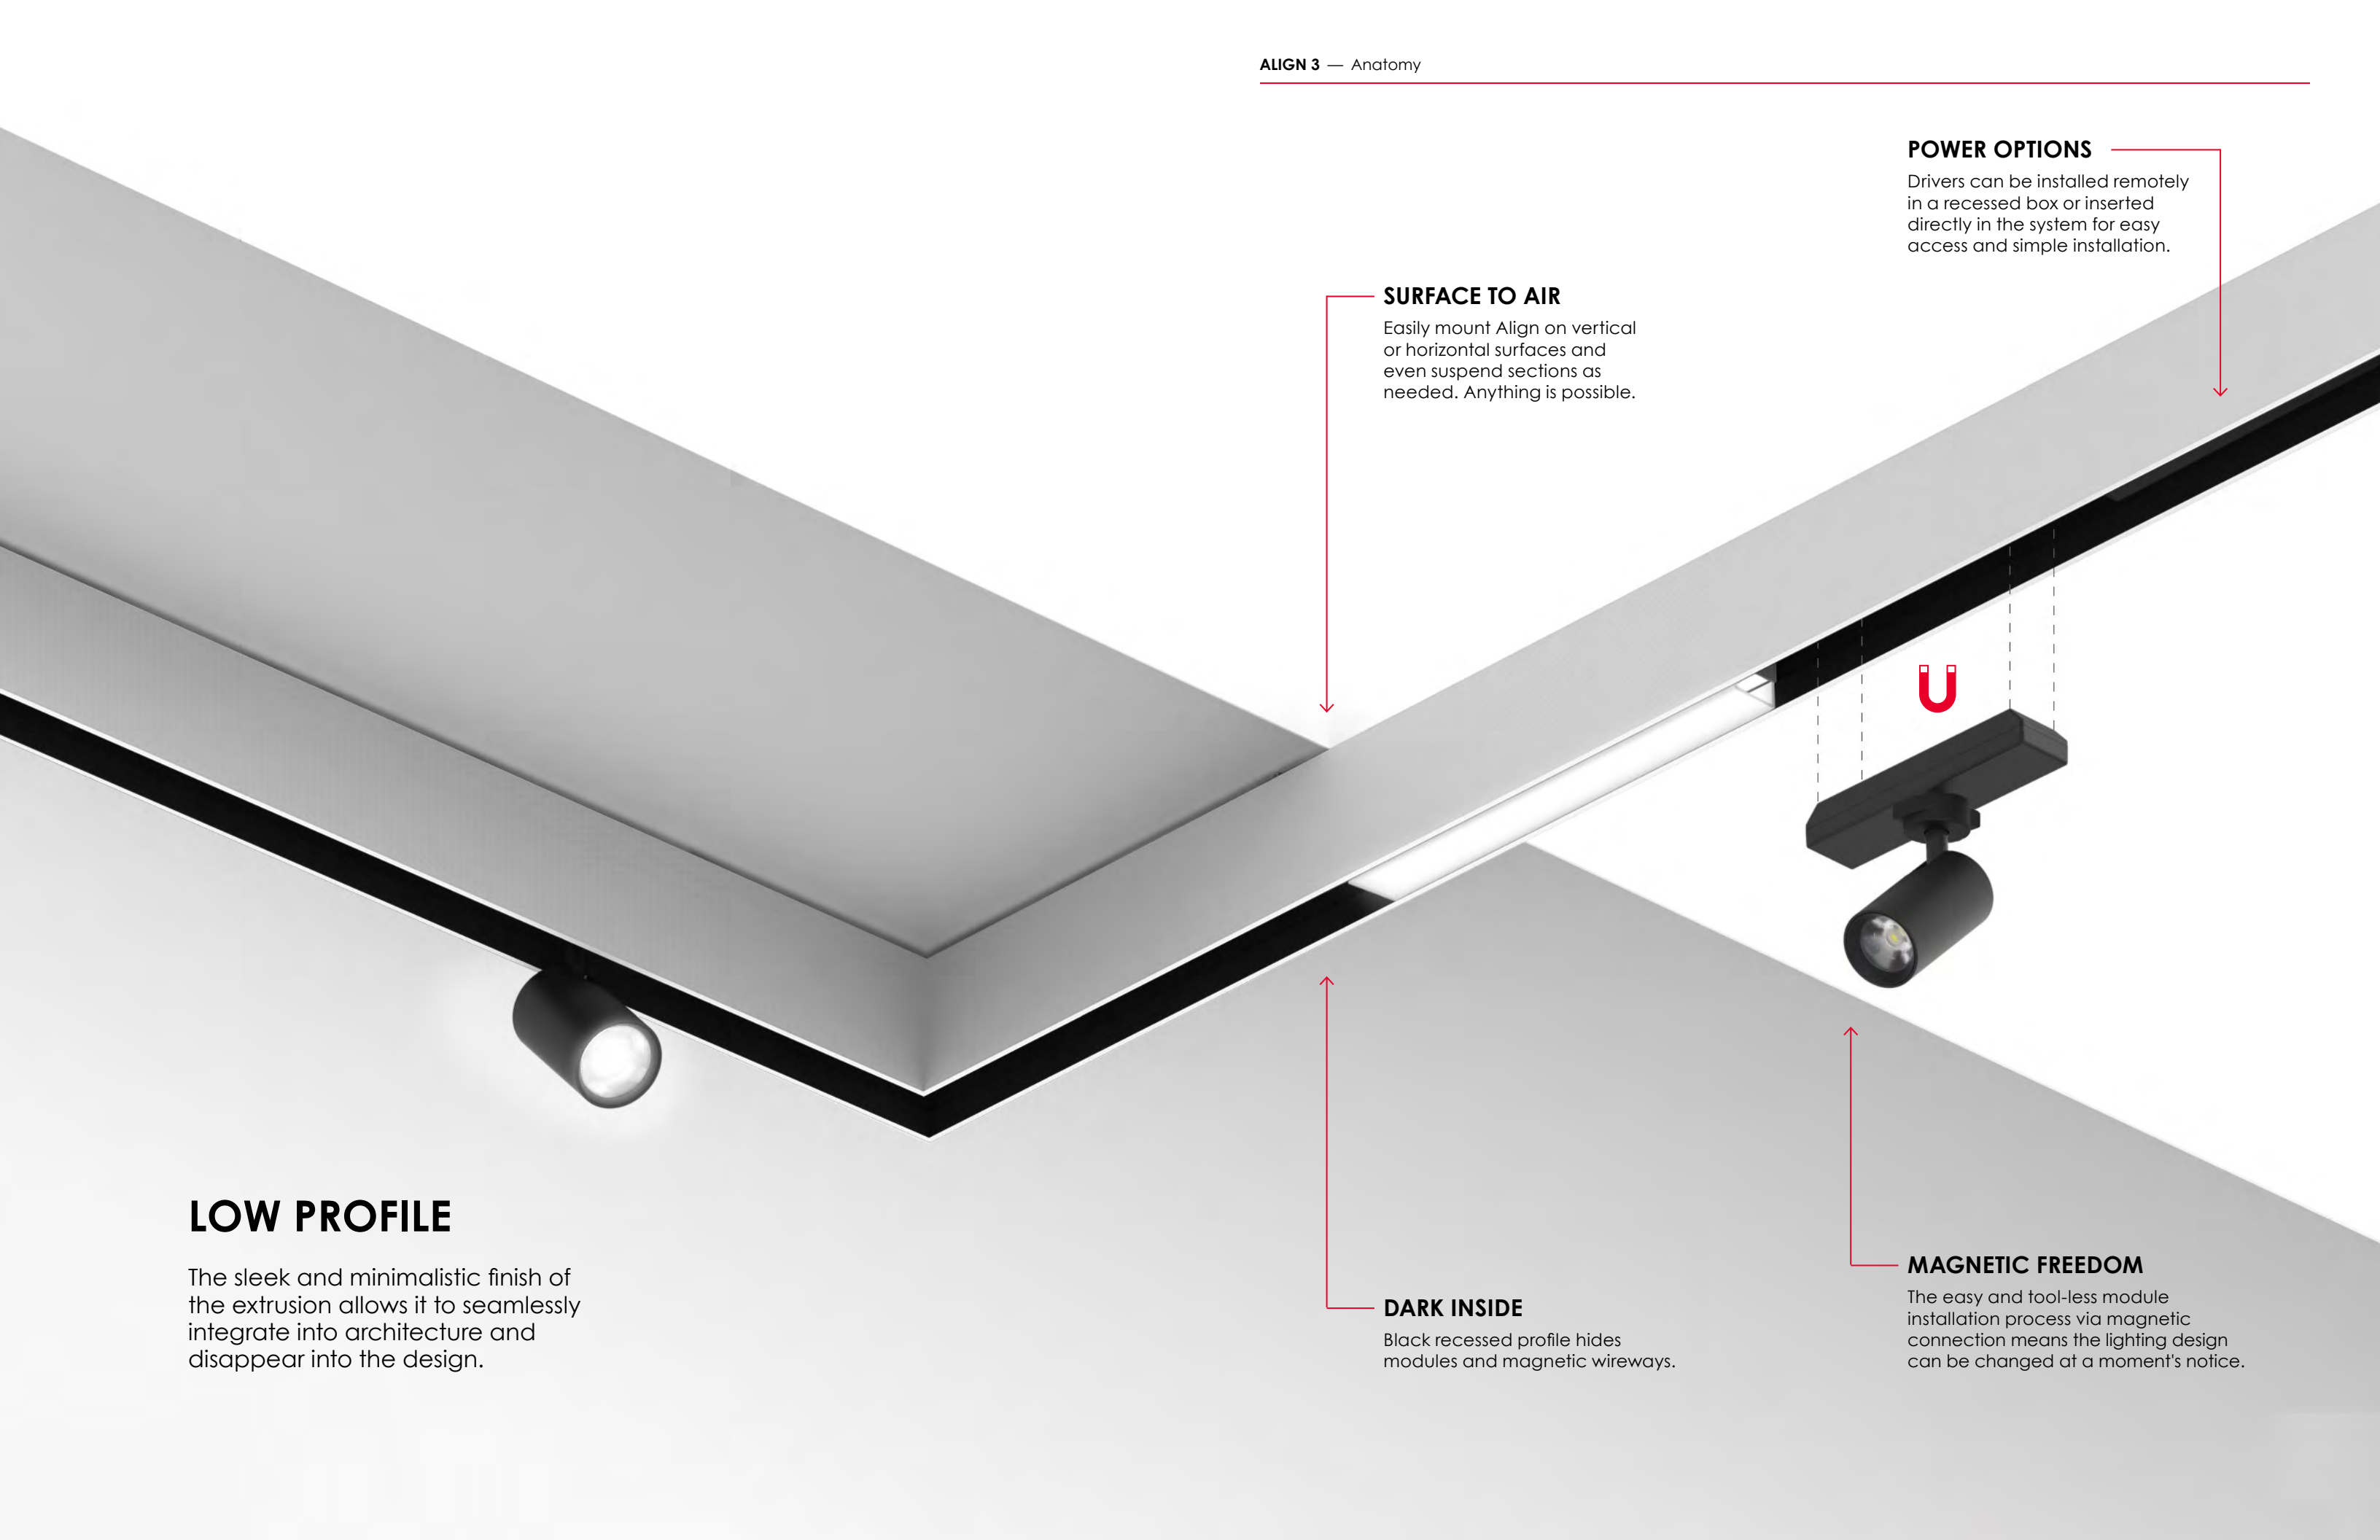

Standard 90° corners enable the system to turn left or right as well as change planes from vertical to horizontal.

ALIGN 3
Surface

a · light

LOW PROFILE

The sleek and minimalistic finish of the extrusion allows it to seamlessly integrate into architecture and disappear into the design.

SURFACE TO AIR

Easily mount Align on vertical or horizontal surfaces and even suspend sections as needed. Anything is possible.

POWER OPTIONS

Drivers can be installed remotely in a recessed box or inserted directly in the system for easy access and simple installation.

DARK INSIDE

Black recessed profile hides modules and magnetic wireways.

MAGNETIC FREEDOM

The easy and tool-less module installation process via magnetic connection means the lighting design can be changed at a moment's notice.

T JOINER

X JOINER

CAPTIVATING GEOMETRIES

Align's X and T joiners* offer designers the freedom to craft captivating grid geometries, with 90-degree angles. Enhance the visual appeal of a space while directing light where it's needed most.

*available for Align 2 and Align 3.
Aircraft cable only.

BAFFLED OPTICS

Ultra discreet optics project a precise illumination as needed.

EASY COME, EASY GO

Integrated design allows for easy and safe removal of the magnetic accessory.

PRECISION LINEAR OPTICS

Offered with Baffled Optic 22°, Baffled Optic 55°, or with a high efficiency diffuse lens (HE Tech™).

DOUBLE BAFFLE

Secondary baffle regressed directly into the accessory's body hides the direct line of sight to the light source, helping to reduce glare.

MIX IT UP

Create your unique lighting configuration – mix and match accessories as needed.

SPOT ON

Alta is a highly configurable magnetic projector accessory for Align. It offers ultimate control over its light source.

COB POWER
High performance LED COB projector offered in two outputs and four standard CCTs.

SIZE & OPTICS
Combine three projector sizes (1.75", 2.15", 3.5") with four available beam angles for maximum light control.

LOCKING RING
Locking ring locks projector in position on the system.

MOVEMENT FREEDOM
Built with a precision fiction hinge, Alta rotates 355° and pivots 90°.

ALTA 45
Smaller diameter projector (1.75") produces up to 1100 delivered lumens.

ALTA 65
3.5" magnetic projector accessory for Align system produces up to 2773 delivered lumens.

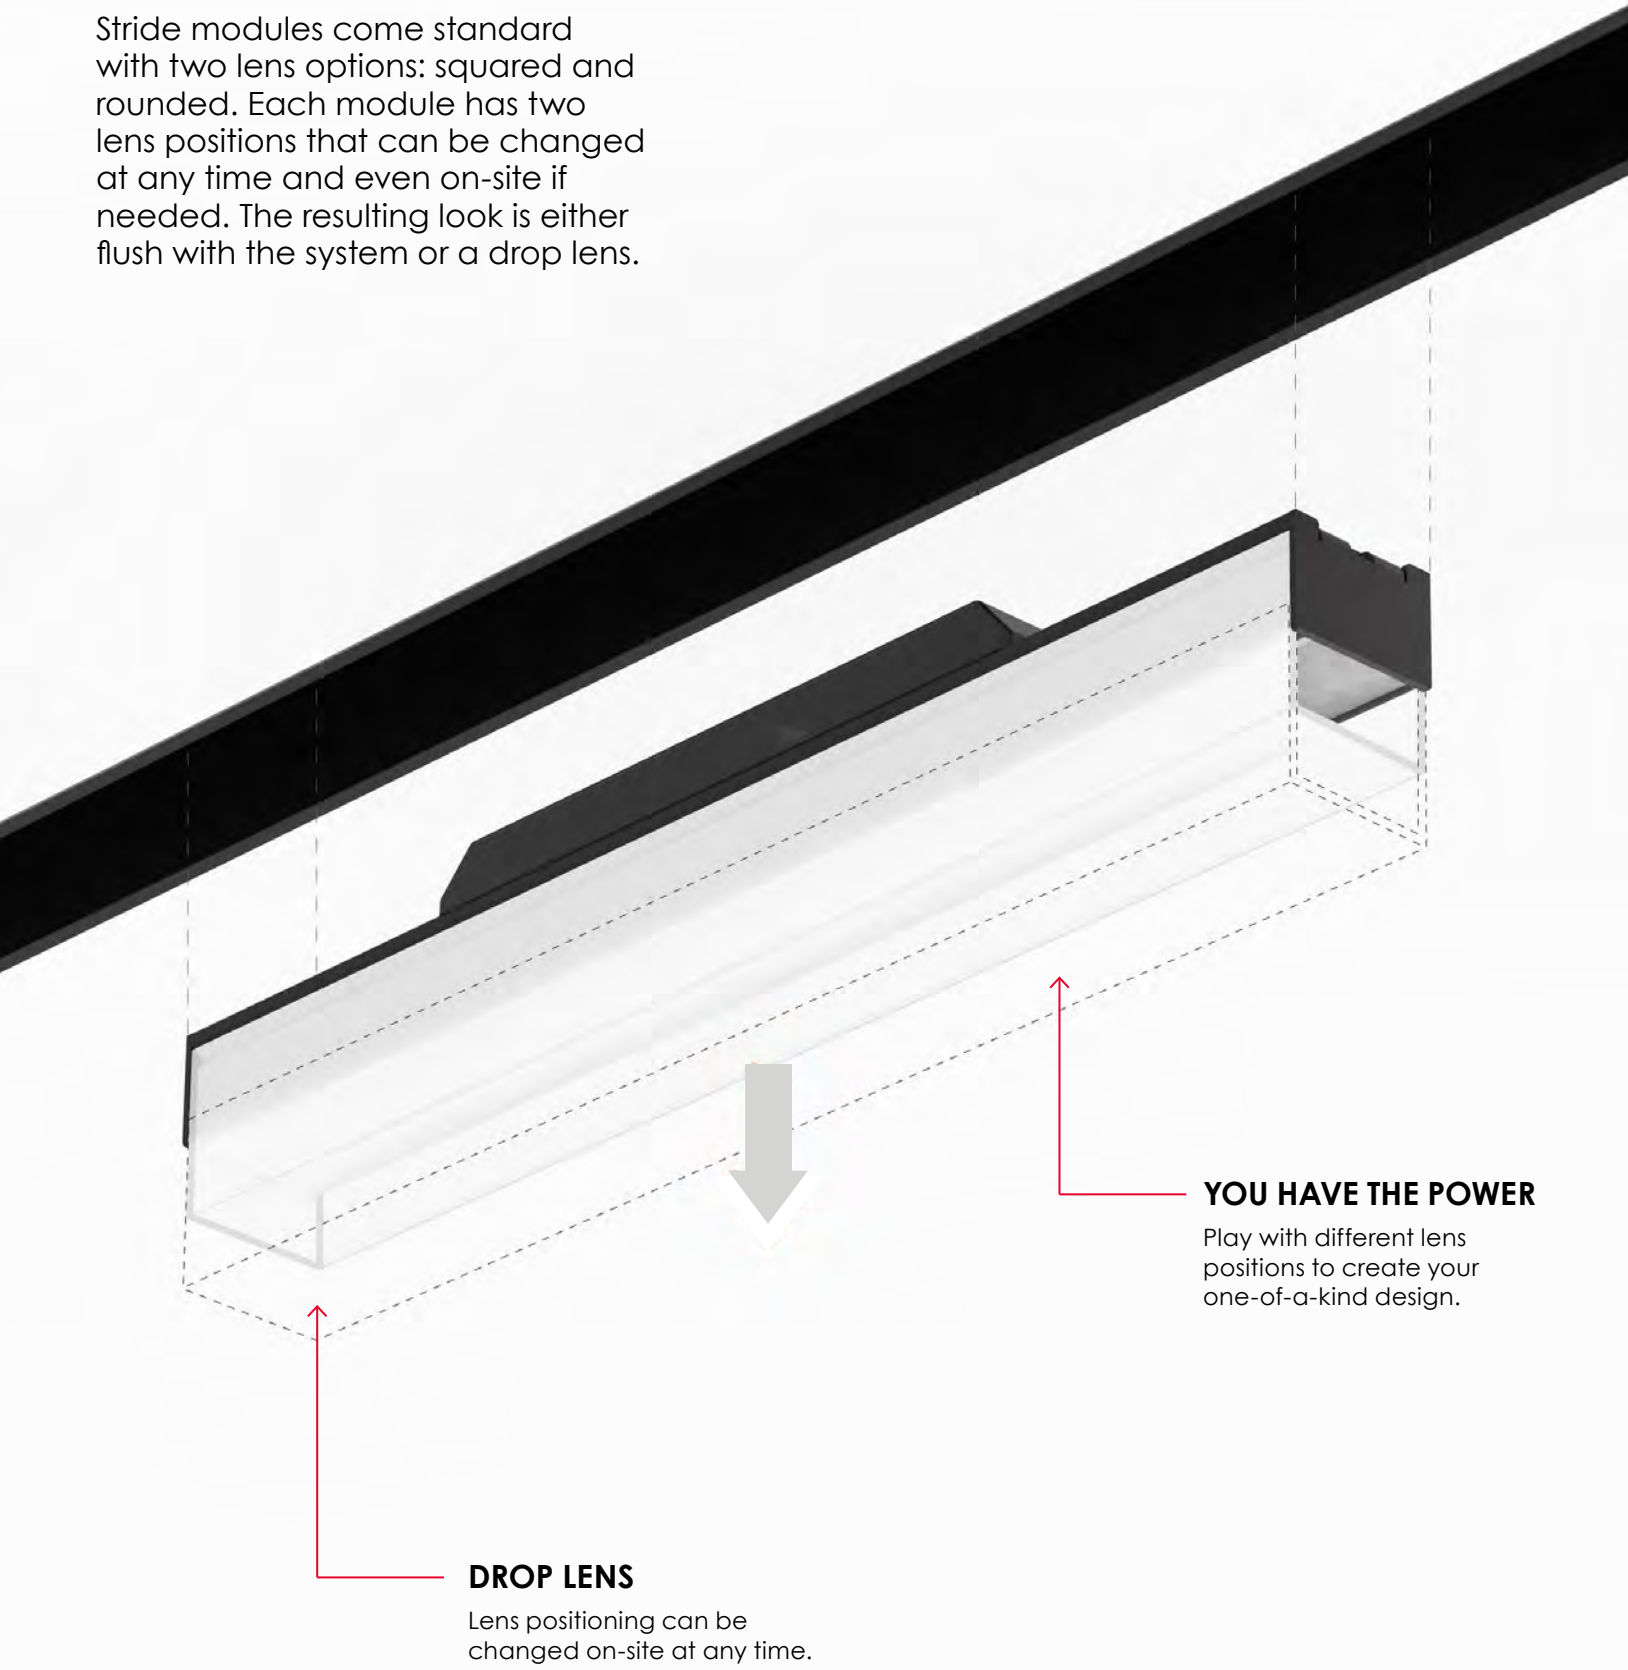

ALTA 55
2.15" magnetic projector accessory for Align system produces up to 1400 delivered lumens.

THREE DIAMETERS

Create your unique lighting configuration with the powerful Alta projector accessories.

UNIQUELY VERSATILE

Stride modules come standard with two lens options: squared and rounded. Each module has two lens positions that can be changed at any time and even on-site if needed. The resulting look is either flush with the system or a drop lens.

DROP LENS
Lens positioning can be changed on-site at any time.

YOU HAVE THE POWER
Play with different lens positions to create your one-of-a-kind design.

ROUNDED DROP LENS
The rounded lens in a dropped position creates ambient glow in all directions.

SQUARED DROP LENS
Use the squared lens in a drop position for a classic look.

ROUNDED FLUSH
When the rounded lens is flush with the system, a small, soft curve is visible.

SQUARED FLUSH
Use the flush squared lens to get a sleek and clean vibe.

A close-up photograph of several Stride lighting modules. The modules are black, rectangular, and shown in various orientations: some are flush with the surface, while others are recessed, creating a glow effect. They are arranged in a way that demonstrates their flexibility in design.

MIX & MATCH

Use the drop lens position for a glow effect and the flush position for streamlined lighting.

PLAY WITH LENGTHS

Stride modules are available in 1 ft., 2 ft., 3 ft., and 4 ft. lengths.

A photograph of a modern lounge interior. The space features a large, open area with a checkered tile floor. In the foreground, there are several grey modular sofas with yellow cushions. In the background, there are more sofas and a large glass wall. The ceiling is white and features a series of recessed Stride lighting modules, which are illuminated, creating a warm and modern atmosphere.
